13. APPENDICES

1. INTRODUCTION

Research & Development is contribution to society through new knowledge, products, and innovations are a prime focus area of the Institute. The Institute actively encourages its faculty and other academic staff to undertake sponsored research and consultancy projects and outreach programs, necessary for maintaining external and global linkages.

Currently, following types of projects are supported by the Institute:

Sponsored Research and Development Projects: which involve creating new knowledge, technologies, methods, processes, etc. and may also involve building of prototypes, proof of concepts, deployable systems, etc.

Consultancy Projects: where concerned faculty/academic staff provide knowledge and intellectual inputs to an organization, often with part of the time being spent on this task with the organization itself.

Some important aspects related to each project are:

- a) **Funding:** Entire expenditure for operation of the project is to be met by sponsorship.
- b) **Operation:** The responsibility for operation of the project lies with Principal Investigators (PIs) / Co (PIs).
- c) **Administration:** The responsibility for overseeing the sponsored project and consultancy activity in the Institute and smooth functioning of these projects lies with Dean of Innovation, Research, and Development Dean (IRD),

2. SPONSORED RESEARCH AND DEVELOPMENT PROJECTS

These projects are headed by a Principal Investigator (PI) and may have Co-Principal Investigators (Co-PIs) including external investigators. The PI can be a faculty member or a member of research staff. The main phases for such projects are discussed here:

2.1 PROPOSAL PREPARATION AND BUDGETING

The project proposal should be formulated according to the format prescribed by the concerned Funding Agency. While making the budget for a project, the following suggestive budget heads should be taken into account

- a) Salary of Project Staff, including PhD scholars/RAs/Interns
- b) Summer Stipend/Fee/ Honorarium / Remuneration for PIs or Co-PIs
- c) Equipment
- d) Consumables
- e) Travel
- f) Contingency
- g) Any Other Expenditure (e.g. audit fee, miscellaneous expenses etc.)

In case of major/regular funding agencies (like DST, Meity, etc.), if their published/standard overhead rates are different, then their rates may be budgeted. Given that most of the sponsoring agencies do not allow appropriation of funds between budget heads, the PI should carefully plan the budget while submitting a proposal.

|
h) Overheads (@20% of Total Project Cost i.e. 20% of the sum of “a” to “g” above).
If a funding organization allows a different rate, then that rate may be used.

Some Notes for Budget Preparation:

- a) The Institute follows the international universities’ model, and allows PIs or Co-PIs to charge up to 33% of their annual yearly salary as “Summer Stipend” as personal income. If a PI takes this honorarium from projects, he/she is expected to spend a proportionate amount of his/her summer on the project and may not take any assignment elsewhere for that duration. The total honorarium from all projects cannot exceed 33% of the yearly salary, and a PI may take honorarium from a project only if it is explicitly budgeted in the project (i.e. there is a line item in the budget of the nature “Fee/Honorarium/... for PI and Co-PI”.) or the PI has received explicit written consent of the funding agency about using the budget and the exact amount or % for his/her salary/ honorarium.
- b) Travel budget may be used by the PIs for any type (domestic/ international) of travel, unless the sponsoring agency has some restrictions. Most of the Indian funding agencies, e.g. DST, Meity, require a formal approval before taking foreign travel. The travel will be as per his/her entitlement in the Institute or in accordance with the policy of the funding agency. Higher class travel may be allowed if permitted by the sponsoring agency and stated in the project proposal.
- c) The salary of project staff will generally be as per rate approved by the Institute. However, higher salary may be permitted provided there is an explicit approval for the same from the sponsoring agency.
- d) When budgeting for PhD students, it is best to keep the head general (e.g. mention it as PhD Scholar, JRF/SRF/RA, etc.) as this will allow funds to be used even if the PhD student gets some other fellowship later. For PhD students the stipend should include their contingency and travel support costs, where possible (this cost can be rounded off to Rs. One Lakh per year).

- |
- e) PhD student costing should also include their tuition fee (at prevailing rate per year). The tuition fee may be waived, if requested, or if not permissible by the sponsoring agency. But, if obtained, it will be treated as (additional) “overhead” to the Institute.

2.2 PROPOSAL SUBMISSION

The project proposal should be submitted to the office of Dean (IRD). The Dean is the competent authority for approving all project proposals. For any proposal which is large in scope and amount (Rs.1 Crore or more), the Dean will discuss it with the Director.

Before submitting the proposal to the Dean (IRD), please ensure to comply with the [checklist](https://docs.google.com/document/d/1Y-5cE5P_B3as9rS4W9_F3lwGAPcPm8AfxlwQOjNS0Xo/edit)
https://docs.google.com/document/d/1Y-5cE5P_B3as9rS4W9_F3lwGAPcPm8AfxlwQOjNS0Xo/edit

If the project is coming from a faculty in a Department or a research center, then the project proposal must be forwarded by the Head of the Department or research center, who takes the responsibility of ensuring that sufficient resources are available, and the project can be executed. The proposal however, should be forwarded to the agency through Dean (IRD).

A proposal that satisfies all the conditions particularly that of the overheads, or is being submitted to standard funding agencies (like DST, Meity using their approved overhead rates, will be approved immediately. Any deviation from the norms (e.g. reduction of overheads, etc.) will have to be discussed and explicitly approved. The approving authority for any relaxation is the Dean, who may consult the Director for larger projects (>1 Cr.) as mentioned above.

The Dean's office will make a suitable record of the proposal, and then dispatch the project proposal to the concerned agency along with the Institute's cover letter. Alternatively, it may give the PI the proposal back for forwarding it to the agency. (Please follow the checklist instructions).

2.3 CREATION OF A PROJECT

Once the project is sanctioned, a Project number is allotted by the IRD division and informed to PI/Co-PIs for future use and correspondence. A project is finally created in the Institute when sponsorship letter is received from the sponsoring agency. A suitable project number will be assigned and necessary actions taken to make the project operational. If needed (when, for example, the first installment is delayed) the institute will provide temporary advance(s) to the project for the work to proceed, which will be recovered as soon as the funds are received. The advance could be up to the 10% of delayed installment, which can also be increased if necessary.

For contribution of the overhead in PDA (IRD), the PIs and Co-PIs will specify to the (IRD office) how the division is to be done among the investigators.

2.4 OPERATION OF THE PROJECT

The funds and the budget of the project are maintained in the Institute. However, the main authority to approve the expenditure from a project is the PI or Co-PI in the absence of the PI. For a sponsored project, any expenditure approval shall be governed by financial delegation of power to PI and Dean approved by the Board of the Institute,

Any change in the budgetary allocation should be approved by the sponsoring agency and office of Dean (IRD) should be informed about the change. On receipt of approval, the accounts office shall adjust the budget heads accordingly. Normally no interest accrues to the project funds unless the sponsoring agency required it .

2.5 SUBMISSION OF PROGRESS REPORTS AND OTHER DELIVERABLES

The PI should send timely reports and other deliverables to the Sponsoring Agency with one copy to the office of Dean as per defined timeline. Utilization Certificate (UC) & Statement of Expenditure (SOE) as prescribed by the sponsors can be obtained by PI from the Dean's Office. In case an audited statement of expenditure is required the Audit fee will have to be charged to the project.

2.6 AUDITING OF FUNDS AND UTILIZATION CERTIFICATE

Accounts of each project are audited every financial year by a Chartered Accountant Firm appointed for auditing the books of account of the Institute. In case, separate audit and report of the Project expenditure is required the same shall be facilitated by the Accounts Division of the Institute. The audited statements may be sent to the sponsoring agency by the PI. Normal period of issue of audited statements is around one week. Activities may be planned accordingly.

2.7 GOODS AND SERVICES TAX (GST)

The Govt. of India has introduced the GST with effect from 1st July, 2017. It has replaced several former taxes and levies which included: central excise duty, services tax, additional customs duty, surcharges, state-level value added tax etc. Its main objective is to mitigate cascading effect of taxes. On some of the projects e.g. consultancy assignments, the GST may be applicable. Since GST is still evolving and a number of changes are being introduced, accordingly, before submitting any proposal Accounts Division may be consulted for the percentage of GST to be included in the proposal.

2.8 PROJECT CLOSURE AND COMPLETION REPORT

Since the project proposal is forwarded by the office of dean, therefore the dean's office is also responsible for submitting the final report to the sponsoring agency. This is intended to ensure that for sponsoring agency the point of contact remains the same i.e. the Dean's office and the agency may not have to deal with number of faculty members for various projects.

| The pi/co-pi shall forward timely the closure report to the dean's office for onward submission to the agency. Unspent balance, if any, with interest thereon, will be transferred to the sponsoring agency. Once the project closes, its account in dean's office is also closed.

2.9 CHANGE OF BUDGET

If the PI of a project wishes to change the budget or the budget head(s) he/she will submit the revised proposal to the sponsoring agency with the consultation of Dean (IRD). Once the budget is approved by the funding agency the same shall be informed by the PI to the office of Dean (IRD).

2.10 CHANGE OF PI

If the PI of a project wishes to leave the project in between for any reason, e.g. going on long leave or leaving the Institute, the PI must inform Dean about the decision in advance (at least 2-3 months) and also inform the sponsoring agency by sending a written request for change of PI. In such cases, one of the Co-PI is made the PI with the approval of Dean. The outgoing PI should also suggest the required changes in contribution of Overhead to the PDA of the new PI. The outgoing PI must also inform the Dean about the stage of completion report. Either the outgoing PI may be asked to submit a completion report or this task could be assigned to the new PI, with the approval of Dean (IRD).

2.11 STANDARD TERMS AND CONDITIONS FOR SPONSORED PROJECTS

The following terms and conditions must be explained by the PI to the sponsoring agency:

- a) The sponsored project will be executed by the PIs, and the deliverables are the responsibility of the PIs. The Institute will provide the PIs the necessary support.
- b) All IPR related issues are as agreed between the Institute and the sponsoring agency.
- c) Any disputes between the sponsoring agency and the PI may be referred to the Dean, who will do the needful to try to resolve the same. The overarching theme for this resolution will be fairness and protection of Institute's reputation and interests. Where needed, to protect the reputation of the Institute, the Dean may insist that part of the

funds taken from the sponsoring agency be returned, particularly if the Sponsoring agency is unhappy with the engagement. Any such decision will be binding on the PIs.

2.12 PROJECT/ CENTRE / PI OVERHEAD DISTRIBUTION

The sharing formula for the actual overhead received is 50:25:25 between PI/Co-PI's (PDA IRD), Centre and Department respectively. In case the faculty is not a member of any Centre, that portion will go to the Institute

3. CONSULTANCY

Consultancy includes all Industry facing activities that generate revenue to the organization. This includes Consultancy projects, CEP course and other such activities.

A consultancy fee is the component that faculty member receives as a personal income per financial year, and other such costs. Consultancy fees received by an individual faculty are subject to sharing with the institute as per the following table:

Consultancy Fee	PI Share	Institute's Share
Up to Rs.10 Lakh	100%	Nil
After Rs.10 Lakh	50%	50%

Note: The consultancy fee up to Rs. 10 Lakh is applicable for per financial year.

Such activities will need to have provision for Goods and Services Tax at the current rate (18%) as applicable and notified by Govt. from time to time. In other words while raising invoice to the sponsoring agency for the project related to consultancy, the consultant should include GST in the total billed amount. This amount will be over and above the consultancy assignment value.

A faculty member can spend at most 1 day per week (week is considered for seven days) on consultancy, including time spent within and outside the Institute on consultancy. The number of days spent on organizing a consultancy related activities will be considered as the consultancy days.

Guidelines for consultancy and consultancy projects & CEP are given here. For any other Consultancy activity, DIRD may be contacted.

3.1 CONSULTANCY PROJECTS

A consultancy contract/project is one where one or more faculty members and research staff provide help and inputs to some organization, primarily for their business activity. This is effectively a “contract work” in which all outputs often belong to the sponsor. The guidelines for consultancy project are as follows:

- a) All consultancy projects will be assumed to be of one year duration. For multi-year projects the explicit year wise budget shall be approved by the funding agency.
- b) Summary of every consultancy activity must be submitted in the Institute using the Proforma given in the Appendix-“B”.
- c) For deposit of GST payments for consultancy fee must be routed through the Institute. This means, that whenever consultancy fee is received, they come in the name of the Institute, which will do the needful for complying with statutory laws and then give the honorarium to the faculty.
- d) Full credit shall be allowed to the PI for the income tax deducted, if any, by the sponsor on payments released for the consultancy activity. The Institute shall claim the same from the Income Tax Department through annual income tax return filed by it.

3.2 CONTINUING EDUCATION PROGRAMS (CEP)

Continuing education programs (CEP) is important for IIIT-Delhi – they can help generate revenue as well as help in building relationships with industry and government. Initial guidelines for conducting/organizing such activities / courses by faculty members of IIIT-Delhi are given below.

- a) A CEP program is generally intensive program over a short duration conducted for working professionals. It may be, for example, two or three day lecture-intensive programs, or one /two week long programs which are a combination of lectures and labs. Such programs may also use blended learning approaches – i.e. a combination of on-line delivery and face-to-face delivery.
- b) Initially the focus will be on high-end programs only, focusing on industry professionals and government officials.

- c) Programs may be conducted at IIIT-Delhi or at external site. If held at IIIT-Delhi, the program will pay for the use of facilities as per the Institute decided rates.
- d) Each CEP/Industry Facing Activity course will have a CEP course-coordinator(s) which will be a faculty member(s) (or officer/engineer) of the Institute. The CEP course can involve other faculty members from the Institute or outside, experts, officers of the Institute, senior students, etc.
- e) For conducting a CEP course / Industry Facing Activity, the Course Coordinator(s) will submit a proposal form with the budget (both income and expenditure) to Institute's CEP coordinator, who will approve the conducting of the course. Template for this request is given in 'Appendix C'. Normally, the course will be approved if it satisfies the guidelines and has minimal impact on regular functioning of the Institute.
- f) It will be entirely the responsibility of course coordinators to conduct the program smoothly. Institute will provide support for such courses, programs & activities.
- g) A standard course certificate may be provided to delegates of approved program. These certificates will be signed by the Institute coordinator (currently DIRD) and the course coordinators. If a course is conducted in partnership with other organization(s) a joint certificate may also be issued, as approved by the CEP coordinator. (This may need the permission of the senate)

3.2.1 FACULTY TIME

- a) A faculty member may give no more than 20 hours of course lectures during the semester. During the vacation, there is no limit.
- b) A faculty member may use up to 0.5 course teaching load at the Institute for CEP courses. (Load reduction due to course may not breach the minimum course load of 1 course/sem.) A course in which a faculty member gives approx. 20 hours of lectures, with corresponding hands-on/lab/project/discussion, may count as equivalent to 0.5 course load.
- c) For courses taught outside or inside the Institute, the visit days will be treated as part of permitted consulting days.

3.2.3 FINANCIAL MANAGEMENT

- a) Each course will have to be fully self-supporting with no budgetary support from the Institute. Revenue for the program may come from participation fees for delegates, or sponsorship, or any other source.
- b) For each course, a project account will be opened in which all incomes will accrue and from which all expenses will be met. An advance for conducting the program will be given subjected to receipt of sponsorship amount or sanction order.
- c) For all courses, on overhead of 20% from overall revenue will be charged by the Institute. However, this may be reduced in case of budgetary constraints. If the course is being arranged in partnership with some other organization(s), then this overhead may be shared with them.
- d) After all costs have been incurred, including for travel, rental fee for facilities like lecture halls, labs, etc., food, honorarium, etc., the “surplus” will be shared equally between the Institute and the Course Coordinators (who can share it with other people involved in the course). If the course was in-lieu of Institute’s teaching load, then Institute will keep 75% of this surplus. The proposal for the course should mention how the coordinators’ portion of the surplus will be shared. The course coordinators and faculty members involved can put parts of it in their PDA, if they wish. If the course is being conducted in partnership with other organization(s) then the surplus will be shared between the Institute and the organization(s) on a mutually agreed manner, and the Institute’s share will be shared with the course coordinators as above.

3.2.3 HONORARIUM RATES

Faculty and students giving lectures and helping in the labs may be given honorarium for this work. The current rates for the same are:

- a) Lectures: For faculty, Rs. 1000 per lecture hour for those courses done in lieu of the Institute’s teaching load; Rs. 5000 per lecture hour for those which are done as additional activity. For PhD students, Rs. 1000 per lecture hour. For senior UGs/ M. Tech students, hon. rate will be Rs. 300 per hour. Institute employed Engineers who directly give lectures may be given honorarium at the rate similar to PhD students.
- b) Lab activities: For faculty, Rs. 500 per lab activity hour for those courses done in lieu of the Institute’s teaching load; Rs. 1000 per lab activity hour for those which are done as additional activity. For PhD students, Rs. 500 per lab activity

hour. For senior UGs/ M. Tech students, hon. rate will be Rs. 300 per hour. Institute employed Engineers who directly participate and help in labs may be given honorarium at the rate similar to PhD students.

- c) Planning and management: The course coordinator(s) may take an additional Rs. 5000 per course day or 2500 for half day for course coordination/ planning, etc. A limit of Rs. 25000 will apply for any CEP course of upto 10 days.
- d) If the course is being conducted in partnership with some other organization(s) honorarium rates should be mutually agreed before-hand and conveyed to the course coordinator before the event.
- e) For institute office staff will be a regular Institute activity to be supported by administration. However, nominal honorarium may be given to those involved in the activity as per the Institute guidelines.

4. PROJECTS AND CONSULTANCY FROM FOREIGN AGENCIES

Projects and consultancy assignments from foreign or multilateral agencies may also be undertaken by the faculty and research staff. (The Institute is permitted under FEMA to undertake foreign assignments.) The rules for these are same as for other projects and consultancy assignments. Travel for these projects will also follow the travel guidelines of the funding agency or in its absence Institute travel guidelines will be followed.

5. COLLABORATIVE PROJECTS

Faculty members may also participate in collaborative projects with other domestic or foreign partners. In such projects, even though there may be an overall project, there must be a separate budget and scope of work statement for the portion to be done by the faculty and staff of the Institute. And the summary statement provided to the Institute should be based primarily on the portion to be done by the Institute. The Institute will then treat this like any other project.

6. SPECIAL GRANTS

Sometimes there are special grants given to the Institute for purposes like fellowships for faculty &/or students, grants for infrastructure improvement, travel grants, etc., where no direct deliverables are envisaged. Such grants may be treated as a project for operational reasons. For such projects, the Institute overhead may be reduced or waived. The decision will be taken on a case-by-case basis by the Dean, in consultation with the Director.

7. FACULTY AWARDS AND PERSONAL COMPENSATION

There are some awards (e.g. IBM/Microsoft Faculty awards or research awards) which are given without any budget head division for the grant, and permit the use of the budget "as per Institute guidelines". For such awards or grants which allow use of funds as per Institute norms and have no budget distribution, the PI is allowed to take personal compensation as per the limits for the projects mentioned above, with the additional restriction that no more than 33% of the total funds or Annual Salary (whichever is less) in the award may be used towards this. Such projects which are based as some research proposal are treated as regular sponsored projects for overhead charges.

8. BOOKS, TECHNOLOGIES DEVELOPED, OTHER IP

Following the practices across the world, books authored by faculty or research staff are not treated as projects or consultancies. Hence, any royalties received for books authored by faculty members are not within the purview of the Institute – they need not be reported to the Institute.

However, any other IP generated by the faculty while working in the Institute, individually or in collaboration with faculty/staff/students, for the purposes of any revenues, will be treated as property of the Institute. The Institute will, on a case-by-case basis, get into an agreement with the creator(s) of the IP, regarding the sharing of revenues that may accrue by selling/leasing/granting rights/etc. of such IP. As the Institute encourages such IP creation, it aims to follow liberal norms for this. The guidelines will be incorporated at Annexure once approved by Board.

9. PROFESSIONAL DEVELOPMENT ALLOWANCE (PDA)

The PDA is created for each faculty member (can also be created for research staff members, on request), and is like a perpetual project whose PI is the faculty member. Receipts in PDA are largely due to some other activity of the faculty member. A PDA will be created for each faculty member soon after his/her joining.

The PDA is divided into two heads namely Institute activities and IRD (Innovation Research & Development) activities. The contributions made by the Institute, e.g. as part of annual performance review, will count towards Institute head and other contributions, which are mainly a result of faculty member's efforts e.g. overheads of sponsored research projects, money contributed from consultancy/Continuing Education Programs, will count towards IRD head. The funds in the Institute head will be governed strictly by Institute's policies while more flexibility is given to the faculty member with respect to IRD funds.

9.1 CREDITS IN THE PDA

The following may be credited into the Professional Development Allowance (PDA) for a faculty or Research staff member:

FOR IRD PDA:

- a) 20% of the overheads of sponsored research projects amongst PI/Co-PI(s); for projects sanctioned in the first 3 years of joining the Institute, after 3 years 50% of the overhead is permitted.
- b) Part of consultancy fees as per the recommendation of PI.
- c) Part of the PI's "summer stipend" in a R&D project, as per recommendation of the PI.
- d) Part of funds of any CEP program, as per recommendation of the faculty member.
- e) Part of the unspent balance, of a Conference/ Workshop / Summer School organized through the Institute as per the recommendation of the authorized chair/ steering committee/ organizer, only after the overheads to the Institute has been paid & profit sharing has been done as per the guidelines with the Institute.

- f) Some types of unrestricted grants with no budgets, with permission of the Dean. Institute overhead may be applicable to such grants.
- g) Any other funds which is a result of faculty member's efforts with the permission of Dean(IRD).
- h) Contribution from FRF/ chair towards PDA.
- i) Donation / Contribution by external members (e.g. sitting fees, honorarium, grants etc.) approved by Director e-mail dated 05.01.2016.

FOR INSTITUTE PDA:

- a) Credit to PDA based on yearly performance review details of which are available in faculty handbook.
- b) The unused portion of the telephone reimbursement allowance.
- c) Part of income generated for the Institute through a CEP program in which faculty member was involved.
- d) From other sources as approved by the director from time to time.

9.2 UTILIZATION OF THE FUNDS IN THE INSTITUTE PDA.

- a) Any professional domestic travel including attending conferences, participating in panels, attending meetings, giving seminars, etc.
- b) For presenting a paper at an international conference appearing in tier I or tier II list of institute approved venues. The presentation could be oral or poster.
- c) For presenting a paper at a reputed international conference that is indexed (Scopus/ ACM/ IEEE or other major DLS) and has been running for five years. Up to a third PDA may be used for such travel.
- d) For attending high quality / reputed summer schools.
- e) For longer term collaboration visits, once every three years, during vacations (per-diem at half the rate). Proper intimation, support for the travel must be provided. Report of the visit to be produced after travel.
- f) The membership fee for professional Societies.
- g) Recruitment of project staff (Ph.D. Scholars / RA/JRF/SRF/interns) by PIs/CIs as per norms for a short-term period not exceeding three months in a financial year at prevailing payment norms.

- h) Charges for filing Indian Patent.
- i) Recruitment of students on a part-time basis, as per norms of the institute.
- j) Purchase of professional books, instructional video and consumables such as external hard drives/USB storage devices/DVD/CD ROM/RAM/common add on card / storage media etc. Such items become property of the Faculty.
- k) To cover local expenses of collaborators/researchers visiting IIITD.
- l) Purchase of cellular phone, pda, tablet, etc. Of cost less than Rs 40000/-. Replacement/upgradation allowed after n years, where $n = \text{mod}(\text{purchase price}/10000)$.
- m) Up to Rs. 10,000/- per fiscal year as research related contingency fund. Bills must be provided for all claims. (Meals/Refreshment claims to be limited upto Rs.500/- per head).
- n) Upgrade of existing equipment upto Rs. 10, 000/-.
- o) For giving keynote in a standard, a long running conference of repute.
- p) A faculty member may use his / her PDA to be used by his/ her PhD student or a faculty colleague as well.
- q) Charges of extra pages for the journals can be paid.
- r) Any other professional activity with the approval of the Dean (IRD).

NOTE: Every year the expense should be limited to Rs. 5 lacs per year, expenditure beyond this requires Director's approval.

9.3 UTILIZATION OF THE FUNDS IN THE IRD PDA

The IRD head allows more freedom to a faculty member and allows following activity besides the one permitted under the Institute head.

- a) For presenting work to an international conference/workshop of repute subject to the approval of Director/ Dean (IRD).
- b) For attending Tier I conferences as per the Institute list.
- c) For attending International Conference/ Workshop of repute subject to the approval of Director / Dean (IRD).

- d) International travel to participate in other events that help in building professional reputation – e.g. Specialized invitation-only workshops, program committee meeting of highly rated conferences, to organize some important event.
- e) For purchase of equipment or accessories for lab.
- f) Up to Rs. 25,000/- per fiscal year as research related contingency fund. Bills must be provided for all claims. (Meals/Refreshment claims to be limited upto Rs.1000/- per head).
- g) Recruitment of project staff, PhD students beyond the period allowed under Institute head.
- h) Any other professional activity with the approval of the Dean (IRD).

As a PDA is treated as project, all purchases shall be made following the Purchase Rules for projects. All limits and processes from Institute's guidelines (Contingency, consumables, equipment and travel) should be synced with PDA guidelines.

10. ORGANIZING CONFERENCES AND WORKSHOPS / EVENTS

Academic events (workshops, conferences, schools, etc.) may be held in Institute premises. Some guidelines are:

- a) Events held on campus should have minimal impact on regular operation of the Institute. So, they are best done during vacation times, holidays, and weekends. However, short programs may be conducted in the Continuing Education facility being developed in the library building during other periods also.
- b) The following facilities may be used for such events: Lecture halls, Class rooms, canteen, library, hostels, guest house, and labs. In general, facilities in the R&D block should not be used.
- c) Hostels will be available only during vacation periods.
- d) For these events, charges for the facilities will be levied for facilities used as per the rates defined from time to time (current rate is defined in office order no. 67/2013 dated 01.08.2013 available on website). For events beneficial to the Institute, or if there are budget constraints, some or all of these charges may be waived/reduced by Dean R&D, and approved by Director.
- e) Honorarium for office staff, if any, should be as per guidelines.
- f) Institute also wants to encourage short workshop for local outreach. Such workshop may seek limited support (upto Rs. 50,000/-) from the Institute (though it is expected

that sponsorship will be sought). For holding such an event, a project account under Dean (IRD) may be started. For this an email request may be sent to Dean IRD with the details of the event, resources to be used with approximate budget, followed by filled form at Appendix 'E'.

- g) For organizing workshops and conferences some Management Agencies have been empanelled by the Institute. The office of Dean can be contacted for conducting events, conference, workshops, seminars etc. through these management agencies.

11. RECRUITMENT OF JRF/SRF/ RESEARCH ASSOCIATES / INTERNS

Research and support staff can be appointed on projects, if there is a budgetary provision for it. All appointments must be approved by Dean, IRD. For now, all posts on the project will be on a consolidated salary basis. Following system of recruitment may be followed:

Duration of Appointment	Process of Recommendation, Selection and Approval
Up to 06 months	PI can directly hire with intimation to Dean's office for the amount and duration of engagement. Information of selection may be forwarded to Dean (IRD). No extension can be given, beyond 6 months from the date of joining, for such staff.
From 06 months and 01 year	On the recommendation of PI by Select Committee. PI may suggest names of 3-5 candidates for interaction with Committee. Committee may approve selection of a candidate. Information of selection may be forwarded to Dean (IRD) through Dean's office. No extension can be given, beyond 12 months from the date of joining, for such staff.
Above 01 year	By placing an advertisement on the web-site of the Institute. Advertisement need to state title of the project, PI, skill set required, duration and stipend amount. A reasonable time, e.g. 2-3 weeks, should be given to apply for the positions since placing the advertisement. Against required skill set the applications will be shortlisted PI. Committee shall interview and forward recommendation to Deans office for approval. No extension can be given for such positions.

For deciding salary of the project staff, the PI will be responsible for follow the guidelines of the sponsoring agency of the project.

12. INITIATION RESEARCH GRANT

Research projects are normally supported through research grants from agencies. However, the process of getting a research grant can take time. To get research started quickly, a new faculty member can get an initiation research grant for setting a lab or research facility needed for research. As a faculty member also gets a contribution in PDA upon joining for profession-related expenses, the initiation research grant is meant primarily for setting research facility. A faculty member may apply by filling the form provided in Appendix 'D'. The guidelines and process for this grant are:

- a) This grant is only for equipment and related consumables/software/etc. for setting up a lab or research facility.
- b) A faculty member must make a short research proposal for this grant, along with the objective of the project, proposed equipment purchase and its justification (including why current resources of Institute are insufficient for the purpose) and the deliverables of the proposed project.
- c) It is expected that this initial and short research proposal will later be expanded or will lead to submitting a larger research proposal to sponsoring agencies, and plans for doing so should also be mentioned in the proposal. Faculty members can submit joint proposals for larger support. The proposal will be evaluated by an Internal Committee.
- d) As the intent of this support is to get the research started, the proposal for the initiation grant should be submitted within one year of joining and the grant should be spent within one year of approval.
- e) Normally the support will be limited to Rs.5 Lakh. Up to 15% of this may be granted for unspecified small equipment (Desktops/Printers are not included)/software for supporting research without a proposal.
- f) (A general clause for handling discipline which don't require equipment.....FC)

14. APPENDICES

14.1 APPENDIX A: FINANCIAL DELEGATION TO PI AND DEAN (IRD)

S. No.	Nature of Financial Powers	Dean (IRD)	PI
1	Purchase of non – consumables (machinery, equipment, furniture etc.)	Rs. 2.50 Lakh on each occasion	Rs. 1.50 Lakh on each occasion
2	Repair & Maintenance of equipment, machinery	Rs. 1 Lakh on each occasion	Rs. 25000/- on each occasion
3	Purchase of Telephone / Mobile and reimbursement of bills.	Rs. 50000/- on each occasion	Rs. 25000/- on each occasion

Consultancy Form

(A softcopy of this form is available on site)

1. Title of Consultancy:

2. Details of Principal Investigator (PI) and d Co-Principal Investigator (Co-PI)

Employee Name	Designation	Load of consultancy (days)	Signature
PI:			
Co-PI:			
Co-PI:			

3. Schedule:

Starting Date:

End Date (appx):

4. Client Details:

S. No.	Particulars	Details
1	Details of the Firm/Organization:	
A	Name	
B	Complete Postal Address	
C	Contact Nos.	
D	FAX / E-mail ID	
E	Contact Person's Name and E-mail ID	
2	Consultancy Fee:	
A	In Figures and Words	
B	Payment Enclosed (No. of Installment and Rs.)	
C	Mode of Payment (Cheque/DD-No. and date), in case of NEFT/RTGS transfer please mention Bank name, date of transfer and Unique Transfer Reference No. (UTR No.)	

5. Budget:

Budget Head Description	Amount (Rupees)
-------------------------	-----------------

A.	Consultancy fee for PI Consultancy fee for Co-PI-1 Consultancy fee for Co-PI-2	
B.	Other recurring expenses (includes Salary/Cost of manpower, Honorarium to others Travel, Contingency, Consumables, etc.)	
C	Non-recurring expenses (include expenses on Equipment, Materials etc.)	
D	Overhead (of B and C)	
E.	Total Charges (A + B+C+D)	

6. Scope of consultancy

Consultancy Type (Please√)

- ☐ Product Development
- ☐ Process Development
- ☐ Checking of Design
- ☐ Checking of Analysis
- ☐ Report Writing/Evaluation
- ☐ Advice
- ☐ Testing and Interpretation

Client Type: (Please √)

- ☐ Private Sector
- ☐ Government Department
- ☐ Public Sector
- ☐ Funding Agency
- ☐ Foreign Organization
- ☐ Others (please specify)

7. Are you planning to involve student(s) in the project, if yes, please share the details:

8. Does the project deliverables include Intellectual Property or know-how already developed before the start of the project?

If yes, please share the details:

Have you included the cost of such IP in the project costs?

9. Does the project include Open source tools? If yes, please share the details (the same has to be communicated to the client in writing):

Agreement between Client and Consultant

This agreement is subject to the Standard Terms and Conditions mentioned below for undertaking consultancy projects at IIT Delhi. The Principal Investigator (s) certifies that these terms and conditions have been made known to the client organization and it has agreed to adhere to the same.

Standard Terms and Conditions of Contract for Consultancy

- a. Consultancy work is a contract between the consultant and the client. Even though consultancy is permitted by the Institute, the Institute takes no responsibility for ensuring the work or the quality of deliverables.
- b. All IPR related issues are as agreed between the consultant and the client.
- c. It is the responsibility of the consultant to ensure that all rules and regulations of the Institute are followed and that the consultancy work being undertaken is within the acceptable scope and that by undertaking the work he/she is not violating any institute norms/guidelines.
- d. The payment should be routed through the Institute normally. In case the consultant takes the payment directly, it is his/her responsibility to satisfy the Govt. norms and rules. In addition, all such assignments must be reported within two weeks of accepting the funds.
- e. Any disputes between the client and the consultant may be referred to the Dean IRD, who will do the needful to try to resolve the same. The overarching theme for this resolution will be protection of Institute's reputation and interests, and fairness. Where needed, to protect the reputation of the Institute, the Dean may insist that the funds taken from the Client be returned, particularly if the client is unhappy with the engagement. Any such decision will be binding on the Consultant.

**PROFORMA FOR SUBMITTING INITIATION RESEARCH GRANT PROJECT PROPOSAL
FOR SEEKING FINANCIAL SUPPORT FROM IIIT-DELHI**

1. Title of Project:
2. Faculty Name:
3. Department/Center:
4. Objective of the Project (please give in 2-3 bullet points):
 -
 -
 -
5. Similar equipment/facility is not available in the Institute: (provide justification)
6. List on approximate cost of equipment (procurement should be complete in a year):
7. Please provide plans for submitting a bigger version to outside funding agency:
