

Anti-Microbial Resistance

The Trinity Challenge on Antimicrobial Resistance proudly announces the winners of its second competition. IIIT-Delhi's project, 'AMRSense: Empowering Communities with a Proactive One Health Ecosystem', led by Dr. Tavpritesh Sethi, has secured the joint second prize. This project, in collaboration with CHRI-PATH, 1mg.com, and ICMR, aims to empower communities to combat antimicrobial resistance. Sharing the honor is the OneHealth Antimicrobial Stewardship for Informal Health Systems (OASIS) project. Both initiatives showcase remarkable innovation and dedication to addressing this global health challenge.

Welcome to CoEHe

India is quickly becoming the cradle of innovations in Digital Health and Artificial Intelligence applied to Healthcare. The Center of Excellence in Healthcare (CoEHe) at IIIT-Delhi has been a catalyst for health systems transformation by contributing AI/ML and digital health solutions for the country. Our mission is to make healthcare accessible, affordable and accountable to all through low-cost technology solutions. Our vision is to be a catalyst for health systems transformation by bringing data and intelligence to the point of care. With a core team of faculty members having diversity of expertise in health technologies, the center is creating cutting-edge scientific advances in data driven public health and medicine through research, education, and engagement with the industry and policy.

Get Started

Research

CoEHe is one of the leading Healthcare Research Centre in India. We foster, promote, and support the research in Healthcare Artificial Intelligence and Machine Learning of

the faculty, postdoctoral fellows, and graduate students at IIIT Delhi. Find out about our work from our social media posts or visit our publications page.

Education

CoEHe supports a range of Artificial Intelligence and Machine Learning programmes for students and staff. State-of-art courses, training, and workshops for our students provide the foundation and advanced skills in the principles and technologies that underlie AI including problem-solving, decision-making, and learning

Join Us

Start your journey and help us shape the future of real-world Artificial Intelligence. At CoEHe you will have the opportunity to work at scale and in multi-disciplinary teams. Explore these opportunities on our jobs page, as we are always looking for candidates with experience in AI and high motivation to develop innovative solutions to make an impact in everyday lives.
