Faculty Recruitment

Applications are invited for tenure-track faculty positions at Assistant Professor, Associate Professor, and Professor levels. A tenure-track faculty is expected to engage heavily in research and teaching. The eligibility criteria for tenure-track faculty positions are similar as in IITs. For an Assistant Professor position, a candidate must have a PhD plus three years experience. However, for PhDs from a well known University/Institute (e.g. IITs/IISc/TIFR/ISI/... in India or well known research universities across the world), and a good research/academic record, the 3 years experience requirement may be waived. The pay scale for faculty is same as in IITs. In addition, extra personal pay may be provided. All regular faculty will be provided on-campus or leased accommodation. Other benefits include initiation research grant, travel support, professional development fund, etc., and personal benefits such as health insurance, LTC, contribution to pension plan, etc. IIIT-Delhi follows a tenure model in which an initial contract is given for 5/7 years. Before completion of initial contract, an extensive evaluation of performance of Research & Teaching is done. If the faculty member's performance is good, he/she can expect to get promoted and tenured. Candidates from the reserved categories are strongly encouraged to apply. The overall selection process is given below. Please visit the Institute website for more information, in particular the faculty page to get a sense of the faculty profile. IIIT-Delhi cherishes and encourages gender diversity, and urges women candidates to apply for faculty positions. We are proud to have about 17% female students in our undergraduate program, and over 46%

in our PG programs - which we believe is the highest in India in Technical Institutions. About 11% of our faculty is also female - while not as high as the Institute desires, it is better than most technical institutions. Almost 37% of our admin officers are women.

Senior Level Positions. At senior levels, IIT-Delhi hopes to attract a selected few who have well established global reputation in research and development and who can take leadership for new centers, programs, etc. Applications are particularly invited from senior researchers who are looking for a suitable opportunity to establish a center in India in some specialized area, particularly interdisciplinary areas.

Visiting Positions and Sabbaticals. IIT-Delhi's faculty are engaged in over 30 collaborations with various academic institutions and research labs across the world. The institute will like to host visitors on their Sabbatical or other programs, like the Vajra scheme. If you are interested in establishing some collaboration, please contact the faculty member you may want to work with or the Director. Senior people who are willing to spend 2 or more years and take up some leadership / administrative position are also invited to contact.

Teaching-Track Positions. To promote excellence in teaching, IIT-Delhi has created a few teaching-track faculty positions, which are primarily targeted towards attracting outstanding teachers into the Institute, and to whom both students and faculty may look up as role-models for teaching. Teaching-track faculty members are regular faculty members in the Institute but with a different emphasis between teaching and research. They will have a higher teaching load and will be expected to engage in high quality teaching, and accordingly, will be expected to have a modest level of engagement in research. The criterion for tenure and promotion also has a higher expectation in quality teaching than research. Minimum qualifications for a teaching-track Assistant Professor is same as mentioned above. However suitable candidates with MTech/MS/ Equivalent and at least 5 years experience are also eligible, if their teaching record and reputation is outstanding. A candidate can apply anytime as faculty applications are

processed regularly. However, it is desirable to apply by March or Sept for July/Jan joining.

Disciplines and Areas of Interest

The main disciplines of interest and the main focus areas within each discipline are given below. Recruitment is not limited to these areas only and candidates in other areas within these disciplines are also encouraged to apply.

Computer Science & Engineering, CSE

Candidates must have PhD in Computer Science, or an allied area, from a reputed institution, and a good research record and background. While candidates from all areas will be considered, the following areas are currently of special interest:

Computational Biology, CB

Electronics and Communication Engineering, ECE

Candidates must have PhD in EE, or an allied area, from a reputed institution, and a good research record and background. While candidates from all areas will be considered, the following areas are currently of special interest:

Applied Mathematics

Candidates must have PhD in EE, or an allied area, from a reputed institution, and a good research record and background. While candidates from all areas will be considered, the following areas are currently of special interest:

Social Sciences and Humanities - for Center for IT and Society

The Department of Social Sciences and Humanities has openings for Tenure Track Assistant Professors in the following areas: Psychology: Cognitive Neuroscience | Cognitive Psychology | Personality and Social Psychology | Organizational Psychology | Media Psychology | Experimental Psychology. Economics: Economics of Information and/or Innovation | Game Theory and Market Design | Social and Economic Networks |

Economics of Network Industries | Sharing Economies | E-Commerce | Computational & Empirical Economics (incl. Big Data applications). Sociology/Anthropology:Media Sociology | Anthropology | Economic Sociology| Anthropology | Sociology of Consumption | Society and Computing | Social Network Analysis | Mobile & Internet User Ethnography | Knowledge Society | Globalization |Urban Sociology | Sociology of Work | Digital Creative Industries Ethics and Politics:Applied Ethics| Moral and Political Philosophy| Ethics of Information Technology| Digital Ethics| Political Theory| etc. Policy:we are looking for scholars with research and teaching interests in areas related to IT and social development, including: Governance and E-governance | ICT Policies | Political economy and the Internet | Internet Governance | Science and Technology policy | ICT for Development (ICT4D) | ICTs for Social Transformation | Social Informatics. New Media:Media Analytics, Computational Social Network Analysis| Digital and Social Media | Mobile Health | Digital Literacy | Digital Creative Industries | Media Psychology | Social Data Analytics | Quantitative Research Methods | Gaming Science and Technology Studies:we are looking for scholars with research and teaching interests in areas related to the domain of science and technology studies (STS) with a focus on Information Technology and society.

Design and Digital Media

With increasing use of Internet and IT based tools in all aspects of our lives, focus on user experience and Design and Design Thinking is increasing rapidly. Digital media is today at the heart of many aspects of design and entertainment - besides internet and mobile based applications, it also forms the heart of areas like animation, special effects, gaming, virtual reality, etc. The Institute plans to establish a group/center which will focus on both of these areas - Digital Media and Design - as they have strong synergies between them. The group will work with colleagues in CS and EE, as these areas complement them richly. Some of the areas of interest are:

Important Dates/ Schedule

For applying: Anytime-applications processed regularly. However, best to apply by March for July joining, and by Sept for January joining. (Deadlines mentioned in the fliers are for special recruitment drives only.) Seminars: On a mutually convenient date; often when the candidate is visiting India. E-seminars can also be arranged. Interaction with Selection Committee: Held regularly, a few times a year.

Application Process

For applying, send an email to faculty-applications@iiitd.ac.in. Subject of the email should be "Faculty position in CSE [or ECE, CB, Math, Digital Media and Design, IT and Society]" (please mention the discipline in the subject - as mails are organized using that). Please attach the following to your email: (i) CV with details about your education (please mention CGPA/percentage also for each degree, including class X and XII), work experience, publications, etc, as well as names of at least three references (if desired, list of references may be sent later upon request from the Institute), (ii) a research statement giving research background, approach, research plans for the near future, etc. (iii) a teaching statement containing teaching approach, basic/foundation courses you would like to teach, advanced courses you would like to teach or design, etc. (iv) external engagement plan for exploring Industry/ Government funding. Non-Indian Nationals, or those applying for senior positions: To help us understand your expectations and motivation, please provide sufficient description of your interests in IIIT-Delhi, and what you hope to accomplish in personal terms.
