Office of Faculty Affairs (DoFA Office)

The Office of the Dean of Faculty Affairs (DoFA Office) oversees the functioning and welfare of IIIT-Delhi faculty members. The Office coordinates with various Departments for the recruitment of new faculty. It oversees the tenure and promotion process. Other aspects that fall within the purview of the Office is logistical assistance to new faculty. The Office addresses day-to-day concerns that faculty may have. In these various roles, the Office contributes towards promoting the well-being of the faculty members at IIIT-Delhi.

Types of Appointments

The appointments at IIIT-Delhi may be of one of the following types: In the first two types of appointments, the faculty member is considered a full-time employee of the Institute and cannot be employed elsewhere (except when explicitly permitted by the Institute). The classification of faculty positions under these two types is made into Assistant Professor, Associate Professor, and Professor (including professors at highest academic grade). The essential qualification, experience etc. for these faculty members is available [here](#).

Non-Regular Teaching Positions

Besides regular faculty, IIIT-Delhi also has non-regular teaching positions. These appointments are normally one of the following:

Visiting Faculty

The primary responsibility of a Visiting Faculty member is to teach courses and/ or

assist in Institute administration. However, visiting appointments may be made for contributing to research also. A full-time visiting faculty is expected to teach two courses (of 4 credits each) per semester, and a part-time visiting faculty is expected to teach one course (of 4 credits each) per semester. These courses will be allocated according to the needs of the Institute and would preferably be courses with large enrolment. They are expected to help in some Institute administrative functions such as members of committees, chairing some committees, helping in various events and initiatives, etc. Visiting faculty members can guide B.Tech. and M.Tech. thesis, IP/ IS/ UR and may be co-guide for Ph.D. students also (where possible). They can also participate in project proposals as Co-PI. In general, a visiting faculty can engage in most activities a regular faculty can engage in.

Visiting Faculty on fellowship (like Inspire, Ramanujan, etc.)

Visiting faculty on Fellowships may be given to candidates who have some Fellowship, which provides for their primary personal salary. The Fellowships often also provide support for research. Good examples of this are DST's Inspire and Ramanujan Fellowships. The primary goal of this appointment is to collaborate with the visiting faculty and help him/her build a strong research profile, while contributing to the academics of the Institute also. Such visiting faculty members are expected to primarily engage in research, and can also guide B.Tech. and M.Tech. thesis, and may be co-guide for Ph.D. students also (where possible). They can also participate in project proposals if permitted by the funding agency. In general, they can engage in most activities a regular faculty member can engage in.

Professor of Practice

Appointees in the Professor of Practice category are distinguished professionals, either practicing or retired. A few may have traditional academic backgrounds, but most do not. The working title of Professor of Practice helps promote the integration of academic

scholarship with practical experience. Appointees provide faculty, undergraduate students, and graduate students with an understanding of the practical applications of a particular field of study. These positions will be limited term contractual positions, and will be for the purpose of teaching courses, advising students, and setting up research collaborations in areas related to their expertise and experience. They may be involved in designing and teaching courses, research and development activities, setting up research collaborations, promoting industry-institute linkages, consulting assignments, entrepreneurship-related activities, contributing in placement-related activities and other institutional initiatives. They can also participate in projects as Co-PI, co-guide B.Tech./ Masters/ Ph.D. thesis/ projects.

Guest Faculty

A Guest Faculty is a member of the Institute whose contribution is more towards academic development than research or any other. They are normally appointed for the purpose of teaching some course(s), and that is their primary responsibility. Guest faculties have to do all the teaching related duties, like invigilation in mid sem and end sem exams, evaluation, holding regular office hours with students and any other duties and responsibilities assigned by the Institute from time to time. They cannot supervise or guide IP, IS, UR, BTP, M.Tech. thesis, M.Tech. SP, M.Tech. Capstone project and Ph.D. Thesis.

Adjunct Faculty

An Adjunct Faculty is the member of the Institute who is associated with the Institute on a secondary level. The adjunct faculty may teach courses or delivers lectures in courses, participate in projects as Co-PI, co-guide B.Tech./ Masters/ Ph.D. thesis/ projects. Only local travel within NCR Delhi region can be paid, where possible. No other financial support will be provided to the adjunct faculty. In addition, no payment will be made for delivering some guest lectures in a course assigned to a regular faculty.

However, if a full course is assigned to the adjunct faculty, based on the need of the Institute, payment may be made as per the Guest Faculty honorarium. In this case, no other financial payment/ support (including local travel) will be provided for visiting the campus or participating in other academic activities as adjunct faculty. An adjunct faculty member's responsibility includes: Participating in courses, participating and co-guiding in projects as Co-PI, and other academic tasks.

Teaching Fellow

The main task of a teaching fellow is to help Instructors of large core courses (courses with strength >100) in managing the course effectively, and in coordination. In a way, they are like "Assistant Instructor". Their role includes helping the instructor in all aspects of running the course, in particular, in managing the tutorials, labs, grading of assignments, helping students with their problems, managing course TAs etc. The fellow may be a primary instructor for summer modules. As per the need of the institute, in Summer Term, the TFs may be involved in admissions or other administrative tasks. In a regular course, the TF would not take classes. The teaching fellow is expected to: Teaching fellow can be full-time or half-time. Normally, a full-time TF is expected to be TF in two large courses. A half-time TF may be the TF for one large course. In some cases, a full-time TF may be assigned one course, and the remaining time may assist in some specific research projects. It is possible to have a half-time TF, who is also given a full-time Ph.D. student appointment – this is done on a case-by-case basis and as agreed by the Director on recommendation of DoAA and HoD.

Honorary Institute/ Distinguished Professors

These are honorary positions and the appointments are done by the BoG. The Institute looks forward to their contribution towards the following activities: teaching courses, guiding/ co-guiding B.Tech./ M.Tech. students, mentoring new faculty members, and helping in some administrative work (such as policy formulation), etc.

Advisors

The advisor extends his/ her expertise towards development of the new curriculum of an upcoming program. The appointments are generally done for a brief period of about 1 or 2 years, based on requirement. They are helpful in formulation of related courses, course design, student project, focused courses, summer course, industry-related activities like outreach and commercializing technologies, etc.

Faculty Benefits

Salary and other benefits will be decided by the BOG from time to time. Currently, benefits to the regular faculty members include:

Leave Rules

It is expected that a faculty member will take leave in a manner that has a minimal impact on teaching and other assigned duties. Furthermore, it is expected that the start of classes in a semester will not be delayed (due to an assignment in summer/ winter) and no more than a few classes during the semester will be impacted due to travel/ leave. Should it be necessary to miss some classes, the faculty member is expected to make them up through extra classes or ensure that some colleague takes them so the syllabus is covered. For any leave, an application will have to be made, as per the leave process.

Faculty Responsibilities, Tenure, Promotion and HAG scale

The primary responsibility of a faculty member is teaching, research and services including academic governance/ Institute administration and professional services. A full-time faculty member is expected to engage in these three, though the levels of engagement can vary for different faculty members. Tenure and promotion of faculty depends on contributions in these three areas. Within the seven-year contract period for a tenure-track Assistant Professor (or five years for a tenure-track Associate Professor or tenure-track Full Professor), a faculty member may request to be evaluated

for tenure. A faculty member will normally not be considered for tenure before he/she has completed six years after Ph.D. . If no explicit request is made, approximately one year before the expiry of the contract period, the tenure evaluation will be initiated. A faculty member may request, with reasons for the same, up to two years extension of the initial contract and a corresponding delay in his/her tenure evaluation. This request will be evaluated on a case-by-case basis. Some reasonable reasons for such a request are: childbirth, serious illness in the immediate family, setbacks in work beyond one's control, etc.

Yearly review, promotion and tenure for Teachers and Academic Staff

1.□Teaching responsibility includes teaching courses, guiding students for their projects and thesis, designing new courses, taking initiatives to improve the teaching-learning process, developing notes and text books, building labs, etc. Suitable measures, including student feedback in courses, may be used to assess the quality of teaching contributions.2.□Contributions in research are largely reflected by Scientific publications, technologies and innovations developed and delivered or deployed. Sponsored projects and Ph.D. students graduated. For assessing the quality and impact of research contributions, measures like journal/ conference quality and ranking, citation counts and indices, downloads/ usage of technology or tool developed, award and recognition, number and value of sponsored projects, number of Ph.D. students graduated and their quality, etc. may be used.3.□Service includes service to the Institute (e.g. serving on committees, taking on responsible positions) as well as to the Profession and Community (e.g. serving on programme and other committee for conferences, serving on editorial boards of journals, serving on committees, advisory boards, consultancy, etc.)4.□The frequency of regular review will be yearly. It may be reduced for Associate and Full Professor to two or three years.5.□The review report will rate the performance of an Institute Teacher in each of the three responsibility areas namely Research,

Teaching and Service in some levels, main ones being: Excellent, Very Good, Good, Average, Below Average.⁶ Based on the performance rating obtained, an Institute teacher may be considered for a higher or lower than “Standard” increments, and may be provided with higher or lower incentives, as per policy approved by the Board.⁷ The teaching load of an Institute Teacher may be increased/ decreased depending on the outcome of the review of his/ her contributions in research and service.⁸ An Institute Teacher may apply for being evaluated for tenure at any point after completing six years after Ph.D. This limit may be relaxed for exceptional cases.⁹ Policy for granting tenure is: A faculty member may be granted tenure if the performance of the faculty member is ranked as good, very good or excellent in research and good, very good or excellent in teaching in his/ her tenure review. The performance in service is expected to be at least average and may be considered for cases that fall on the borderline.¹⁰ The process for ‘tenure evaluation’ will include getting letters from experts from within and outside the country, some of which will be from the list provided by the Institute Teacher. Based on the letters and the contributions of the Institute Teacher, a committee constituted by the Director will categorize the performance in the three areas in different levels (excellent, very good, good, average, below average) and based on this make its recommendations about tenure. The recommendations of the committee will be put to the statutory selection committee for Institute Teacher selection, which will make the final recommendation.¹¹ The final recommendation of the tenure evaluation process will be one of the following: -(a) The faculty member has demonstrated good, very good or excellent performance in research and teaching and may be granted tenure.(b) The faculty member has not fully demonstrated good, very good or excellent performance in research and teaching, but has demonstrated potential and may be granted an extension period of up to three years to improve the performance and seek tenure again later. (This option will not be applicable if an

extension has already been granted i.e. the extension can only be granted once).(c)□ The faculty member does not seem to be well suited for a research-led academic career and should not be granted tenure i.e. he/ she may not be offered another contract.12.□ The minimum experience required for consideration for the post of Associate Professor position will be as decided by the Board, which may be relaxed for exceptional candidates.13.□ For an Assistant Professor, assessment for tenure and promotion may be done together or may be done separately. An Assistant Professor, who is already tenured, may request for promotion, if eligible. The eligibility criteria for consideration for Associate Professor: At least 6 years post PhD experience in teaching / research/ industry.14.□ For faculty members directly recruited at the Associate Professor level without tenure, their assessment for tenure and promotion may be done together, or may be done separately. The eligibility criteria for consideration for Full Professor: At least 10 years post PhD experience in teaching/ research/industry, of which at least 4 years should be at the level of Associate Professor.15.□ The process for 'tenure and promotion evaluation' will include getting letters from experts from within and outside the country, some of which will be from the list provided by the Institute Teacher. Based on the letters and the contributions of the Institute Teacher, a committee constituted by the Director will categorize the performance in the three areas in different levels (excellent, very good, good, average, below average) and based on this make its recommendations about tenure and promotion. The recommendations of the committee will be put to the statutory selection committee for Institute Teacher selection, which will make the final recommendation.16.□ For promotion to Full Professor, the process for evaluation will be similar to the tenure process (i.e. letters will be sought and then based on a comprehensive evaluation recommendation will be made). Final selection to the Full Professor position will be based on the recommendation of the statutory Selection Committee.17.□ The minimum experience

required for consideration for the post of Full Professor position will be as decided by the Board, which may be relaxed for exceptional candidates.¹⁸ If a faculty member's application for promotion to Full Professor is declined, normally a gap of two years is required for consideration for Full Professor again.¹⁹ Applications for promotion (including tenure) will be received twice a year. Deadlines for receiving applications are June 30 and December 31 each year. Only those who have completed the minimum eligibility by this date may apply. On request, a relaxation of up to 1 month may be given by the Director for submission of CV and other records. If the outcome of the promotion process (which may take more than 6 months) is that the promotion is granted, then the date of promotion will be reckoned as the day after the deadline for application, namely July 1 or January 1, as applicable.

Process for granting HAG Scale to a Professor

1. The eligibility criteria for consideration to granting HAG Scale to Professor: As defined in the policy approved by the Board for granting HAG Scale to a Professor; where at most 40% of Professors (at least 1) can be on HAG Scale at any time. A minimum service length of 6 years as Professor with outstanding/excellent performance in Research, Teaching, Project Funding and Service to the Institute shall be the eligibility criterion for consideration for HAG Scale. For professors who are entering laterally into the system, their service period elsewhere as Professors or equivalent positions will be counted towards the required service period of 6 years as Professor. Based on the availability of HAG Professor positions, the applications with detailed information about research, teaching, project funding and service to the Institute of eligible faculty can be submitted to the DoFA.

2. The process for granting HAG scale is: (a) A faculty member meeting the requirements as per the above policy may request to be evaluated for being granted the HAG Scale. The faculty member will be informed when the process for the same is initiated. (b) For evaluation and giving recommendations, an Expert

Committee comprising of four experts will be constituted.i.□For selecting the set of experts on the Committee, the concerned faculty member may give a list of at least six experts in the area, from which two will be nominated by the Director.ii.□The other two expert members may be nominated by the Director.(c)□Threshold as an overall average rating for the four categories (i.e., research, teaching, project funding and service to the Institute) for the grant of HAG may be set by the Expert Committee and informed to the potential applicants while initiating the process. The minimum expected rating in each category and overall average rating in all categories shall be set while initiating the process.(d)□The faculty member concerned prepares a portfolio comprising of a detailed CV highlighting research, teaching, project funding and service to the Institute and best papers published while holding the position of Professor or equivalent position. Wherever available, summary of the yearly feedback submitted may also be included in the portfolio by the faculty member.(e)□The Expert Committee will be requested to evaluate each faculty portfolio under consideration for granting HAG for research, teaching, project funding and service on the scale of 1-5, with 1 being interpreted as demanding more efforts, 2 as average, 3 as good, 4 as very good and 5 as outstanding. The overall average rating on these four categories (while calculating average rating, the rating of service domain should be multiplied by a factor of 0.6 while the others will be multiplied by 1.0) along with recommendations for the “grant”/ “not recommended for the grant” of the HAG Scale will be made to the Director. The Director shall consider the recommendations of the Expert Committee suitably and further recommend to the BOG for grant of the HAG Scale. While recommending any case to the Board, the Director may override the recommendations of the Expert Committee by giving proper justification.3.If a faculty member’s application for granting the HAG Scale is declined, a minimum gap of two years is required for consideration for granting the HAG Scale. For reconsideration of a case, a statement of changes in the CV/ contributions since the last

consideration will need to be provided by the applicant. The entire earlier package, along with this statement of changes shall be placed before the Expert Committee for assessment/evaluation for giving its recommendations.4.Applications for HAG scale will be received twice a year. Deadlines for receiving applications are June 30 and December 31 each year. Only those who have completed the minimum eligibility by this date may apply. On request, a relaxation of up to 1 month may be given by the Director for submission of CV and other records.

If the outcome of the process (which may take more than 6 months) is that the HAG scale be granted, then the HAG scale shall be granted with effect from the day after the deadline for application, namely July 1 or January 1, as applicable. Documents to be submitted» Detailed CV highlighting research, teaching, project funding and service to the Institute and best papers published while holding a position of Professor.» Summary of the yearly feedback submitted may also be included.» A list of at least six experts in the area.

Research and Development Matters

IIT-Delhi provides support in R&D matters, like:

Professional Travel

Faculty members have to frequently travel for professional work, like attending conferences, visiting lab/ universities/ corporations for giving a seminar, attending technical meetings, selection/ expert committee meetings, etc.A faculty member will ensure that such travels align with the overall academic goals of IIT-Delhi and that such travels have a minimal impact on teaching and other Institute commitments. Should some classes fall during the travel periods, the faculty member will either arrange the class to be conducted by some colleague or will arrange for extra classes to make up for these classes. Overall, during the semester, each faculty member will make active efforts to minimize travel and keep each travel for the shortest duration possible. Also,

when combining personal stay with professional travel (e.g. staying for a few extra days after the conference) he/ she will not claim any DA for these days. Such professional travel is generally done on Special leave, though some may be "on duty". The travel procedure is:

International Research Exposure Fellowship

Faculty members who have not had any international research exposure (i.e. have not worked overseas as a Ph.D. student/ post-doc/ visiting person, etc.) can be considered for limited support for spending up to six months (encompassing one semester) in some good research lab/university for doing research. (Current support: \$2000 per month + RT ticket). Part of the support for this visit will come from the faculty member's PDA, and most of the teaching commitment for this semester will have to be made up, normally within one year of returning. This visit may be allowed only if it does not affect the smooth functioning of the academic programs. The faculty member who avails of this will be required to serve the Institute for at least one year after availing this facility. (Failing which the cost incurred by the Institute for the visit will be recovered.)

Initiation Research Grant

Research projects are normally supported through research grants from agencies. However, the process of getting a research grant can take time. To get research started quickly, a new faculty member can get an initiation research grant for setting a lab or research facility needed for research. As a faculty member also gets a contribution in PDA upon joining for profession related expenses, the initiation research grant is meant primarily for setting research facility. The guidelines and process for this grant are:

Further details are available in the IRD Manual.[Click Here](#)

Conduct rules

Professional Ethics and Conduct

FAQs

1. What is the eligibility to apply for an Assistant Professor position?

For an Assistant Professor position, a candidate must have a Ph.D. plus three years experience. However, for Ph.D.s from a well-known University/ Institute (e.g. IITs/IISc/TIFR/ISI/... in India or well-known research universities across the world), and a good research/academic record, the 3 years experience requirement may be waived.

2. What is the selection process? Can overseas candidates also apply?

IIIT-Delhi encourages faculty from abroad to apply for faculty positions. A candidate can apply anytime as faculty applications are processed regularly. However, it is desirable to apply by March/September for July/January joining. More Details are available at <https://iiitd.ac.in/careers/faculty>.

3. I am a fresh Ph.D., can I apply for a faculty position?

Fresh Ph.D. applicants with excellent academic and research records are considered for the position of Assistant Professor. The Postdoc requirement may be waived in case of outstanding candidates.

4. I will be defending my thesis soon (I don't have the Ph.D. degree yet), can I still apply?

Yes, candidates with outstanding credentials can be considered and offered a faculty position conditional on the successful completion of a Ph.D. .

5. How long will it take IIIT-Delhi to make me an offer?

It takes about 2 weeks after the Selection Committee completes the process, to make an offer.

6. How soon will I be expected to join after getting the offer?

The onboarding process starts around July 15 or December 15 every year, based on the date of offer made. We are flexible in considering requests for extension in joining time, in case of any genuine concern. Acceptance or rejection of the offer, however, is

expected within 1 month of the date the offer is made.

7. When would the Semester begin and end?

Monsoon Semester: August – December Winter Semester: January – May

8. What is the expected teaching load per year/semester?

The typical teaching load per year is two courses (one per semester).

9. How can a faculty member develop research facilities?

The Institute goes out of its way to extend help to individual faculty wanting to pursue research in specific areas of interest. In addition, research proposals including expenditure/ research budget for research infrastructure, can be submitted to the Institute or to external funding agencies. The Institute also supports a few Ph.D. students on Institute fellowship.

10. Are faculty members expected to write research proposals to funding agencies?

Yes, the Institute strongly encourages faculty to seek external funding for research. Securing external funding for research is a key catalyst for a vibrant research culture, developing institutional facilities, and training research manpower.

11. How do we apply for research funds from industries and government agencies?

There are calls for proposals and you can visit companies/ funding agencies to seek funding. Alternatively, you can collaborate with others. You can discuss with the Dean IRD to obtain more details.

12. Can faculty take up consultancies?

IIT-Delhi encourages faculty members to take up consultancy assignments based on the expertise of the faculty, not easily available outside. They are allowed to spend up to one day per week on consultancy work. The Institute deducts nominal costs towards overheads from the income. The consultancies need to be conducted through the Institute, and shall not be in the faculty member's personal capacity.

13. What is a tenure-track faculty position?

The appointment duration is 7 years for Assistant Professor and 5 years for Associate Professor within which a faculty member applies for tenure. At IIIT-Delhi, the normal distribution of faculty members' efforts is expected to be broadly 40%-40%-20% among research, teaching, and service – Assistant Professors are expected to spend less in service; teaching-track faculty members are expected to spend more effort on teaching and less in research. Some types of appointment are:

14. When is a faculty member eligible for tenure?

Within the seven-year contract period for a tenure-track Assistant Professor (or five years for a tenure-track Associate Professor or tenure-track Full Professor), a faculty member may request to be evaluated for tenure. A faculty member will normally not be considered for tenure before he/she has completed six years after Ph.D. .

If no explicit request is made, approximately one year before the expiry of the contract period, the tenure evaluation is initiated. A faculty member may request, with reasons for the same, up to two years extension of the initial contract and a corresponding delay in his/her tenure evaluation. This request will be evaluated on a case-by-case basis. Some reasonable reasons for such a request are: childbirth, serious illness in the immediate family, setbacks in work beyond one's control, etc.

15. When is a faculty member eligible for promotion?

The eligibility criteria for consideration for Associate Professor: At least 6 years post Ph.D. experience in teaching/research/industry. A faculty member may request to be evaluated for tenure and promotion, together or separately. The eligibility criteria for consideration for Full Professor: At least 10 years post Ph.D. experience in teaching/ research/ industry, of which at least 4 years should be at the level of Associate Professor.

16. Is faculty housing available inside the campus?

The campus is situated in Okhla, Phase-III with a Metro station within half a kilometer,

with modern, good quality and spacious accommodation for faculty. A faculty member is eligible for on-campus residential accommodation on a nominal license fee (currently INR 2,590/- per month) in lieu of HRA. In the event of non-availability of campus accommodation, in lieu of HRA, the faculty member may lease a suitable accommodation, within the limits prescribed by the Board of Governors (currently INR 50,000/- per month).

17. Is there an Initiation Research Grant for new faculty?

Research projects are normally supported through research grants from agencies. However, the process of getting a research grant can take time. To get research started quickly, a new faculty member can get an initiation research grant for setting up a lab or research facility. The current limit approved by the Board of Governors is INR 10,00,000/- (approx. 12000 USD at the rate of 1 USD = 83 INR). The utilization of this grant is to be initiated within the first year of joining.

18. What support does IIITD give towards professional development activities?

Each faculty member has a Professional Development Account (PDA). The Institute contributes INR 3,12,500/- at the time of joining of new faculty in the PDA. Going forward, the Institute contributes an amount up to INR 3,75,000/- (approx. 4500 USD at the rate of 1 USD = 83 INR) depending on the outcome of yearly reviews. For every project a faculty member gets, a certain percentage of the overhead received from the funding agency is credited to his/ her PDA. The PDA may be used for various activities including purchasing books, society membership, travel, etc.

19. What is the Annual Review Process?

Every faculty member submits an annual report with details under three broad categories: Research, Teaching and Service. The report contains research contributions for the last three years in a sliding-window manner e.g. for the report to be submitted for June 2024, research contributions starting from June 2021 can be reported. The

reviewers will have the opportunity to see the long-term research evolution and comment accordingly. It will also provide assurance and sufficient time for faculty to tackle tough problems and not compromise on quality. External domain experts give inputs and suggestions for improvement. Every year PDA contribution is done depending on the outcome of the annual review.

20. Are employment opportunities available for spouses at IIITD or in the neighbourhood?

The merit of the candidate is the main consideration, and IIITD neither gives preference nor discriminates in hiring spouses. The Institute is located in the capital and there would be many employment opportunities for spouses around Delhi/ NCR.
