Startup Fair 2024

Startup Fair 2024

Start-up Fair 2024, presented by the Placement & IOP office IIIT-Delhi, is a wholehearted effort to integrate students with the start-up work culture by connecting them to internship opportunities. The StartUp Fair is one such event where the two main stakeholders come face to face on the same platform. It is an opportunity to market the vision, product, technology & future that the Start-up is bringing on the table & invite the student community to join hands.

What is there for the Start-up:

Start-ups are expanding to drive sustainable growth and generate employment opportunities and students can make innovative, effective and efficient contributions by being a part of this dynamic ecosystem. This is completely in line and inspired by our Prime Minister's Start-up India initiative. The past eight editions have seen immense success with a plethora of start-ups visiting the campus & witnessing an overwhelming and enthusiastic response from the student community.
