

The department of mathematics provides a vibrant environment for research and teaching in mathematics. The department was set up in 2017, and currently consists of 12 full time faculty members, 3 joint faculty members, one visiting faculty member, and one lecturer whose research areas include Algebra, Algebraic Coding Theory, Number Theory, Combinatorics, Theoretical Computer Science, Applied Cryptography, Computational Mathematics, Dynamical Systems, Ergodic Theory, Functional Analysis, Operator Theory, Partial Differential Equations, Operator Algebras Mathematical Biology, Mathematical Logic and Foundations of Mathematics, and Statistics. The department offers a four-year undergraduate program: BTech in Computer Science and Applied Mathematics (CSAM), and a Ph.D. program in Mathematics.
